EDUCATION

Maharaja Institute of Technology Mysore

Bachelor of Engineering in Computer Science Engineering

Karnataka

Aug. 2023 – present

EXPERIENCE

Software Development Intern

CodeFlurry Technologies

Sep.2026 – Present

Mysore, Karnataka

- Contributing to software development tasks involving application development, backend development, debugging, and testing.
- Working with development tools and frameworks to build and maintain software applications.
- Collaborating with the development team to understand requirements and implement software solutions.
- Gaining hands-on experience with real-world software development workflows, version control, and debugging.

PROJECTS

FrameSense — AI-Powered FPS Game Performance Analyzer | YOLOv8, OpenCV, FastAPI,

Jan 2026

- Developed a web application for FPS gameplay analysis using Python, FastAPI, OpenCV, and YOLOv8.
- Built REST APIs for gameplay processing and implemented FPS and latency metrics.
- Developed an interactive dashboard for presenting analysis results; secured 3rd place in a college project exhibition

Mystic Arcade — Gaming Café Management System | Python, FastAPI, MySQL, HTML, CSS

June 2025

- Developed a gaming café management application using Python, FastAPI, MySQL, HTML, and CSS.
- Implemented REST APIs for bookings, gaming station allocation, sessions, and billing.
- Designed database-driven workflows using MySQL for structured application data management.

Blood Bank Management System | PHP, MySQL, HTML, CSS, JavaScript

July 2025

- Developed a PHP and MySQL web application for managing donors, donations, hospitals, staff, and blood inventory.
- Implemented role-based access control for Admin, Coordinator, and Nurse users.
- Developed inventory and request workflows with availability, expiry validation, search, and filtering.

OralGuard AI — AI-Based Oral Health Detection | CNN, OpenCV, Computer Vision

April 2026 -Present

- Developing a computer vision application for oral-condition detection using CNN, OpenCV, and Python.
- Preparing and augmenting image datasets to improve model robustness across different image conditions.
- Designing and testing the image-processing pipeline for varied image angles and orientations.

TECHNICAL SKILLS

Languages: Java, Python, SQL, C/C++, JavaScript

Frameworks: React, Node.js, Flask, FastAPI, Django

Developer Tools: Git, Docker, Google Cloud Platform, VS Code, GitHub

AI & Computer Vision: YOLOv8, OpenCV, Computer Vision, Machine Learning

Databases: MySQL, MongoDB, PostgreSQL

Web & APIs: HTML, CSS, REST APIs
